Work Experience

PT. Kencana Maju Bersama (Viva) <i>Full Stack Developer</i>	- Surabaya, Indonesia	Oct 2025 - Now 10 Months
• Built an end-to-end warehouse ERP system (web + mobile) for 30+ business entities, covering multi-warehouse, master data, and inventory tracking. • Developed the web app with a Laravel backend and Vue.js frontend, and designed the MySQL database schema for multi-warehouse stock movements. • Built a Flutter mobile app for stock-taking with QR code scanning, connected to a REST API as the single source of truth for inventory logic and data sync. • Set up server monitoring and ongoing maintenance to keep the system available and healthy.		
PT. Kencana Maju Bersama (Tobang) <i>Project Manager - Full Time Hybrid</i>	- Surabaya, Indonesia	Oct 2024 - Oct 2025 1 Year
• Directed mobile app, website, and system projects from planning to deployment. • Assigned tasks to developers and managed product backlogs. • Monitored server performance and checked logs to prevent issues. • Coordinated app and website releases to ensure smooth updates. • Led team meetings and tracked project progress.		
PT Dinergi Dimensi Informatika <i>IT Developer - Part Time Remote</i>	- Sidoarjo, Indonesia	Sept 2024 - June 2026 1 Year 9 months
• Implemented state management React TypeScript with Redux for efficient data handling and UI updates. • Automated tasks and workflows using Power Automate, Selenium, and Playwright to increase efficiency and reduce manual work • Handled User Guide Documentation and conducted UAT to ensure apps met user requirements and expectations.		
KoffieSoft (PT. Dapur Perangkat Lunak Indonesia) <i>Mobile Developer & UI/UX Designer - Full Time Hybrid</i>	- Surabaya, Indonesia	Oct 2023 - Oct 2024 1 year
• Built and optimized mobile apps with REST API integration and responsive UIs. • Used GetX, Provider, and BLoC for efficient state management. • Handled app redeployment to Play Store and ensured compliance. • Led project planning, team coordination, and performance improvements.		
Tempo360 <i>UI/UX & Design Lead (Project Base) Remote</i>	- Jakarta, Indonesia	Mei 2023 - Feb 2025 1 year 10 month
• Led design projects from concept to delivery, ensuring deadlines and quality standards were met. Conducted usability testing and incorporated user feedback into designs. Presented design solutions to stakeholders and ensured alignment with brand guidelines. Managed various Komatsu projects, including brochure and PowerPoint design, SEMrush keyword research, catalog research, website redesign (komatsu.co.id), and currently overseeing heavy equipment brochure redesign.		
Burningroom Technology <i>Flutter Developer - Full Time Hybrid</i>	- Surabaya, Indonesia	Jan 2023 - Apr 2023 4 months
• Developed a doctor booking application from scratch, including app structure management, UI design, API integration, and state management, preparing it for production. Oversaw the entire app development process, ensuring seamless functionality and a user-friendly interface.		
Trust Medis <i>Flutter Developer - Full Time Remote</i>	- Surabaya, Indonesia	Jun 2023 - Dec 2023 7 months
• Developed several apps, including enhancing an existing app using Flutter boilerplate and GetX for state management. Worked on resolving issues in production apps, including a POS application, and contributed to UI development and API integrations for other apps.		

Pens Vestifal - Surabaya, Indonesia	Jul 2022 - Dec 2022
<i>Mentor Mobile Flutter - Part Time Hybrid</i>	6 months
Mentored 8 teams in developing mobile apps, guiding them through problem-solving and app development best practices. Conducted weekly offline and online meetings to ensure teams made sound decisions and met project goals effectively.	

NF Computer - Surabaya, Indonesia	Sep 2022 - Dec 2022
<i>Flutter Developer - MSIB Study Independent Remote</i>	4 months
Learned Flutter from scratch and developed an e-commerce application, handling UI creation, API integration, and deploying the app to the Play Store. Gained hands-on experience in the complete app development lifecycle.

Achievement & Project Highlights

- Achievements (2025): Completed expert-level certification in multi-platform development** and built a production-ready application using Flutter. Implemented responsive UI, clean architecture, state management, and RESTful API integration to deliver consistent experiences across Android, iOS, and web. (dicoding.com/certificates/EYX4K7016PDL)
- Achievements (2025): Growth-Driven Design Certified** – Earned certification in applying the Growth-Driven Design framework to build and optimize high-performing websites. Assessed on best practices and proven capable of implementing data-driven improvements for continuous website growth. (89efca1f7a67412693dd11273ccb0e18)
- Achievements (2025): Belajar Dasar Visualisasi Data** – Successfully completed foundational training in data visualization, acquiring skills to present data through clear and engaging charts, graphs, and dashboards, supporting effective data-driven decision-making. (dicoding.com/certificates/2VX32M79NPYQ)
- Achievements (2021): Best Soft Skills on PENS FEST with Scrum Methodology (Technology Exhibition)** - Making android mobile based applications using FLUTTER with RESTful API.
- Project Fasindo (Flutter, BLoC, REST API, flutter_map)**
Super app for the property sector with house model booking, interactive site map, and multiple business approval systems.
- Project Tobang (Flutter, GetX, REST API, Firebase Notifications)**
E-commerce platform for construction materials with member and seller roles, product management, courier selection, and Indodana payment integration.
- Project Fake Gojek (Flutter, GetX, OpenStreetMap, Sqflite)**
Simplified delivery app using OpenStreetMap for location, with offline delivery history and item details
- Project Sofa App (Flutter, GetX, GraphQL, PDF Printing)**
Store management app for products, expenses, and income with multi-role access, graph reports, and integrated printing.
- Project Komatsu.co.id Website Redesign (UI/UX, SEO Optimization) – Tempo360**
Website revamp to improve navigation, visual consistency, and search engine ranking.
- Project DTMS V2 (Flutter, BLoC, gRPC, Sqflite, OpenRouteMap)**
Multi-platform fleet management system for Petrokimia Gresik, with real-time truck tracking, offline mode, and route mapping.
- Project iPhone Gresik POS (Laravel, MySQL)**
Web-based POS and inventory system for iPhone retail operations. Includes product management, cashier transactions, role-based access, and stock alerts.
- Project DAT Indonesia (Laravel, MySQL, RajaOngkir, MidTrans)**
Premium e-commerce platform for audio products. Features include product catalog, stock management, secure checkout, shipping modules, and integrated multiple payment gateways.
